

DSX Access Systems, Inc.

WinStart / WinStart SQL

WinStart / WinStart SQL - Starter / Update Kit

The WinStart consists of: 1-WinDSX Software USB Flash drive, 1-Upgrade Document, Hardware and Software docs in PDF Format. This version uses Microsoft Access™ for the DataBase engine. This version of Software requires a DSX SoftKey (dsxkeydata.xml) but does not require a hardware dongle to be left connected.

The WinStart SQL consists of: 1-WinDSX SQL Software USB Flash drive, 1-Upgrade Document, Hardware and Software docs in PDF Format. The WinStart SQL uses Microsoft SQL Server as the database engine. (NOTE: Does not include Microsoft SQL Server™ This product requires advanced configuration. The Dealer or End User must have a Microsoft SQL Server Administrator to install, configure, and maintain the SQL Server on site.) The WinStart SQL Flash drive contains both the Access and SQL Versions so that the Access version can be updated prior to migrating the database to SQL Server.

A Tech Binder is given to each dealer when they come to DSX for their initial training. Up to date Documents are shipped in PDF format on all software distribution flash drives and the Resource drive.

Software distribution flash drive contains the following documents:

- 1022/1040/1030 Series Hardware Installation Manuals
- DSX, L85 and SIO Software Installation Manuals
- 1022/1040/L85 Quick Reference Cards
- PC Requirements
- WinDSX System Specification
- RMS1076 UL Manual
- DataBase Program Record Sheets
- DSX FAQs
- DSX Site Survey
- Stacked Device Types
- DSX Services
- Preventive Maintenance Checklist
